

A PADDLE ISN'T GOOD
ENOUGH ANYMORE

Diversity Fin[®] IPX Antenna

IP44 rated directional diversity antenna

FOR MICs 
470-928 MHz

#1 Recommendation for outdoor portable/temporary events

1 NEEDED FOR A DIVERSITY MIC SYSTEM

BENEFITS:

- All-Weather Reliability: Like the CP Stage Antenna, IPX is Rated IP44, featuring a weather-resistant seal and downward-facing BNC connectors to protect against rain and dust.
- Patented Cross-Polarized Design: Replaces two traditional "shark fin" paddle antennas with a single, high-performance unit that reduces cost, setup time, and user error.
- Superior Signal Integrity: Specifically designed to combat multi-path interference, providing a more stable RF environment for wireless microphones.

TARGET AUDIENCE AND VENUES:

A highly ruggedized enclosure makes this the ideal choice for touring professionals who require gear that can survive extreme environments. IPX was designed to handle whatever you throw at it on tour or outdoor installs.

PATTERN AND RANGE*:

120° horizontal coverage with typical range of at least 300'

*Range will depend on many factors and is subject to your local conditions

PLACEMENT EXAMPLE:

Put it at stage wings of front of house (FOH). Point at transmitters (or where the talent is).

SKU:

DFIN-IPX - black with stand mount

DFIN-IPXW - white with stand mount

FAQ

Why should I choose the IPX over the original Diversity Fin?

- Choose the IPX if you need an IP rated solution for your install.
- Choose the IPX if you need a rugged antenna that can handle touring.
