

A PADDLE ISN'T GOOD
ENOUGH ANYMORE

CP Beam™ Antenna

Collapsible circularly polarized antenna with stand mount

MOST POPULAR FOR IEMs 
470-698 MHz

#1 Recommendation for portable/temporary events - our longest distance antenna

2 NEEDED FOR A DIVERSITY MIC SYSTEM

BENEFITS:

- Outperforms paddle antennas. Circular polarization provides a consistent signal to IEM body packs regardless of performer orientation
- High gain allows for lower transmit power and lower noise
- Lightweight & fits into a 2RU drawer

TARGET AUDIENCE AND VENUES:

Wireless IEM users who need focused coverage and high gain in large live events

PATTERN AND RANGE*:

~70° beam pattern with typical range to 600'

*Range will depend on many factors and is subject to your local conditions

PLACEMENT EXAMPLE:

Put it at stage wings or front of house (FOH). Point at receivers (or where the talent is)

SKU:

CPB

BUNDLED PACKS AVAILABLE:

COMB4CPB

COMB6CB

COMB8CB

FAQ

How is the CP Beam different from the CP Stage?

The CP Beam is our premium CP antenna for large venues. It offers a more focused signal pattern with higher gain in a larger overall size. The CP Stage has a wider pattern with lower gain, in a smaller, robust (IP Rated) package - useful in a wide range of locations.

Why is it better than paddles?

Circular polarization provides a consistent signal to IEM body packs (or mics) regardless of performer orientation, unlike paddles.
