

Design Review Checklist

Email Answers to Info@rfvenue.com

Here are the Standard Questions we ask for antenna and coverage design.

- Provide an overhead drawing with dimensions of the coverage area/zones needed along with room names and distances apart.
- Provide Location of rack
- Provide antenna mount options
- Provide info on obstacles and building materials
- Provide any single mode fiber run locations
- Provide address of proposed set up
- Provide number of channels desired with brand, model numbers and frequency bands

Optional: Provide a RF scan from 169MHz to 700MHz

Not sure how to get a scan? Just ask us, we're happy to help.
